# PETITION – SAVE WORKCOVER CAMPAIGN

*Petition to Mike Rann about the WorkCover Amendment Bill*

We the undersigned call upon the Premier to support injured workers and not cut their pay or remove their rights as is proposed in the Amendment Bill currently before state Parliament. In addition we wish to convey to the Premier the following points :

1. Nobody asks to be injured
2. We need safe workplaces to prevent injury in the first place
3. Getting people back to work safely and fairly should be the focus of workers compensation schemes
4. Cutting the pay of injured workers does not help them recover and will cause financial hardship at an already difficult time for them and their families
5. If someone loses a limb or body function at work they should be properly compensated
6. A worker should be able to dispute a decision about their workers compensation payments without having their pay suspended.
